

## REAL virgins

lon and prevent hair from  
burning. While the air  
spewing out of ordinary  
hairdryers can reach 230C, the Supersonic  
never exceeds 150C. Four heat settings and  
three air flows, combined with nozzles that  
attach to the end magnetically, make it easier  
and faster to dry and style hair, he says.

I pop downstairs to the Dyson salon and  
have a go with the Supersonic under the sharp-  
fringed gaze of Emelya Robinson, a stylist at  
Atelier, an upmarket hair salon in nearby  
Bristol. The dryer, which comes in white and  
silver as well as pink and grey, is comfortable  
to hold and wave around, and we manage to  
discuss our holiday plans without shouting.
